

PREPSEED PRESENTS · PREPDESK

Know exactly how work gets done — automatically.

A single, white-labeled workforce platform — time tracking, attendance, productivity and AI-driven reporting, running natively on **Windows, Mac & Linux**. Sold under **your** brand.

[Company Overview →](#)

Employee Monitoring, Productivity & HRMS · 2026 Edition

THE PROBLEM

Hybrid teams run on **guesswork**, not data.

Nobody knows where the day went

Hours logged on a timesheet rarely match hours actually worked.

One tracker, half the team

Windows gets tracked, Mac and Linux users stay completely invisible.

Reports nobody reads

Raw activity logs dumped on managers, with no narrative and no next action.

Burnout, spotted too late

No early signal for overwork, after-hours logins or falling engagement.

Attendance still runs on Excel

Manual registers, cross-checked shifts and disputed leave balances every month.

Monitoring feels like surveillance

Bolted-on tools capture everything and explain nothing — trust breaks down.

Payroll built on disputes

Miscounted hours and overtime arguments, every single cycle.

Five subscriptions, zero sync

Time tracker, attendance app, screenshot tool and leave system — none talk to each other.

INTRODUCING PREPDESK

One platform. Every hour, every app, every team member.

PrepDesk brings automatic time tracking, attendance, productivity monitoring and AI reporting into a single workforce workspace — running natively on every OS.

Dashboard

Live view of who's online & how productive

Time Tracking

One-click, automatic, works offline

App & Web Usage

Productive vs. unproductive, auto-tagged

Screenshots

Configurable, blurrable, fully transparent

Attendance & Shifts

Rosters, late flags, holiday calendars

Leave Management

Requests, approvals, balances in one tap

Projects & Tasks

Billable time, budget vs. actual

AI Insights & Reporting

Plain-English digests, anomaly detection

Integrations

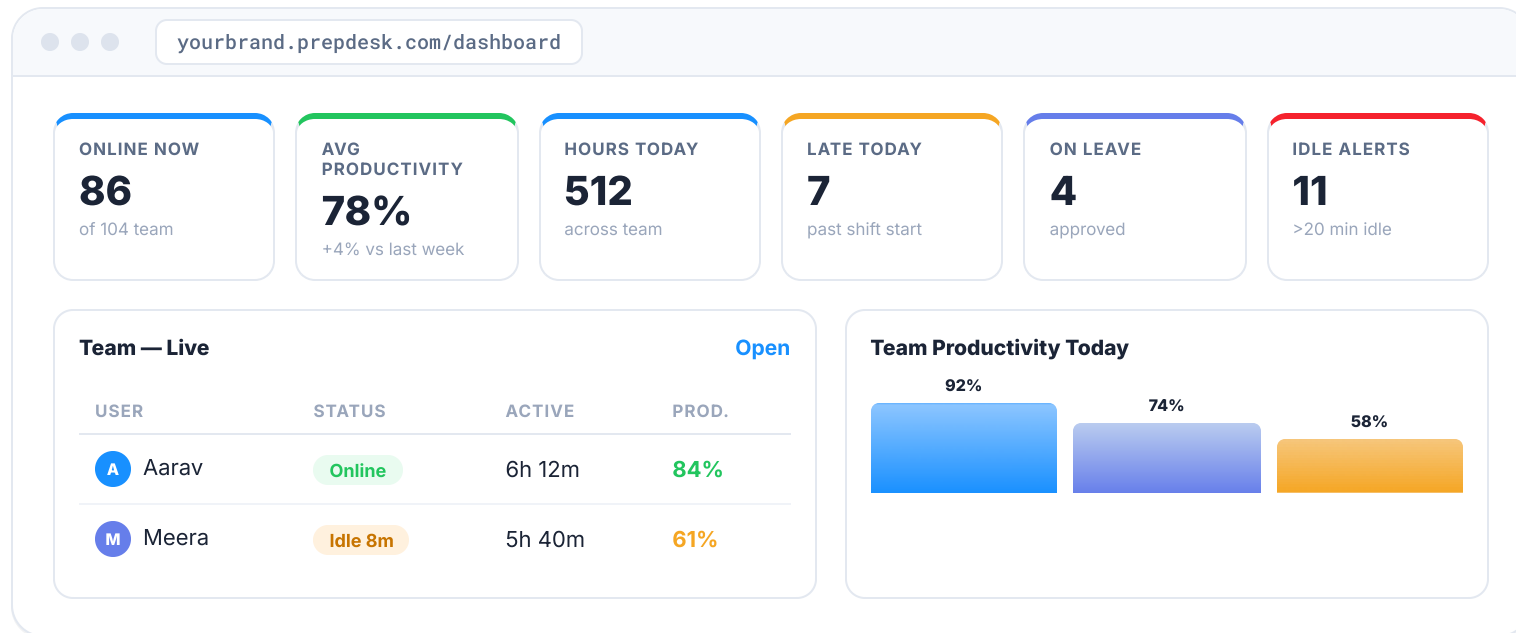

Slack, Google, Jira, payroll & more

Cross-Platform Apps

Native builds — Windows, Mac & Linux

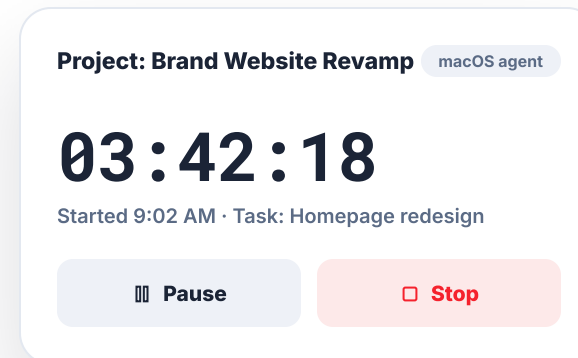

See your entire workforce in **one glance**.

- ✓ **Live team pulse**
Who's online, idle or offline, and a real-time productivity score — refreshed continuously.
- ✓ **Built-in scoring**
Every app and site is auto-classified so a productivity percentage appears without setup.
- ✓ **Idle & late alerts**
Idle time, late clock-ins and unusual patterns surface the moment they happen.
- ✓ **Role-aware**
Owners see the whole company; team leads see exactly their own reportees.

One click to start. **Zero effort** after that.

- ✓ **One-click clock in/out**
A lightweight desktop widget starts and stops the day — no browser tab, no manual entry.
- ✓ **Runs quietly in the background**
Tracks time against the active project automatically as people switch tasks.
- ✓ **Idle detection, built in**
The timer auto-pauses after inactivity and prompts before counting idle time as work.
- ✓ **Offline-first**
Keeps tracking with no internet and syncs the moment connectivity returns — nothing is lost.

ONE APP. EVERY OPERATING SYSTEM.

Native agents for **Windows, Mac & Linux** — not a browser plugin.

Whatever your team runs, PrepDesk runs on it. Same features, same accuracy, same lightweight footprint — across every machine in the company.

Windows

Windows 10 & 11 · x64 / ARM64

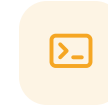

- Silent MSI/EXE installer, deployable via GPO or SCCM
- Runs as a background service, auto-starts on login
- Auto-updates without interrupting the user

macOS

macOS 12+ · Apple Silicon & Intel

- Notarized .dmg, MDM-deployable (Jamf, Kandji)
- Native Apple Silicon build — no Rosetta overhead
- Respects macOS privacy prompts & permissions

Linux

Ubuntu, Debian, Fedora, RHEL

- .deb, .rpm and ApptImage builds — pick your package manager
- Scriptable install for engineering & DevOps fleets
- Same feature set as Windows & macOS, no compromises

WHY IT MATTERS

<1% CPU footprint

Runs quietly without slowing anyone down.

Central deployment

Push to 500 machines the same way you push to 5.

Feature parity

One codebase — no OS is the "lesser" build.

Auto-updating

New releases roll out silently, fleet-wide.

Every hour, sorted into productive and not.

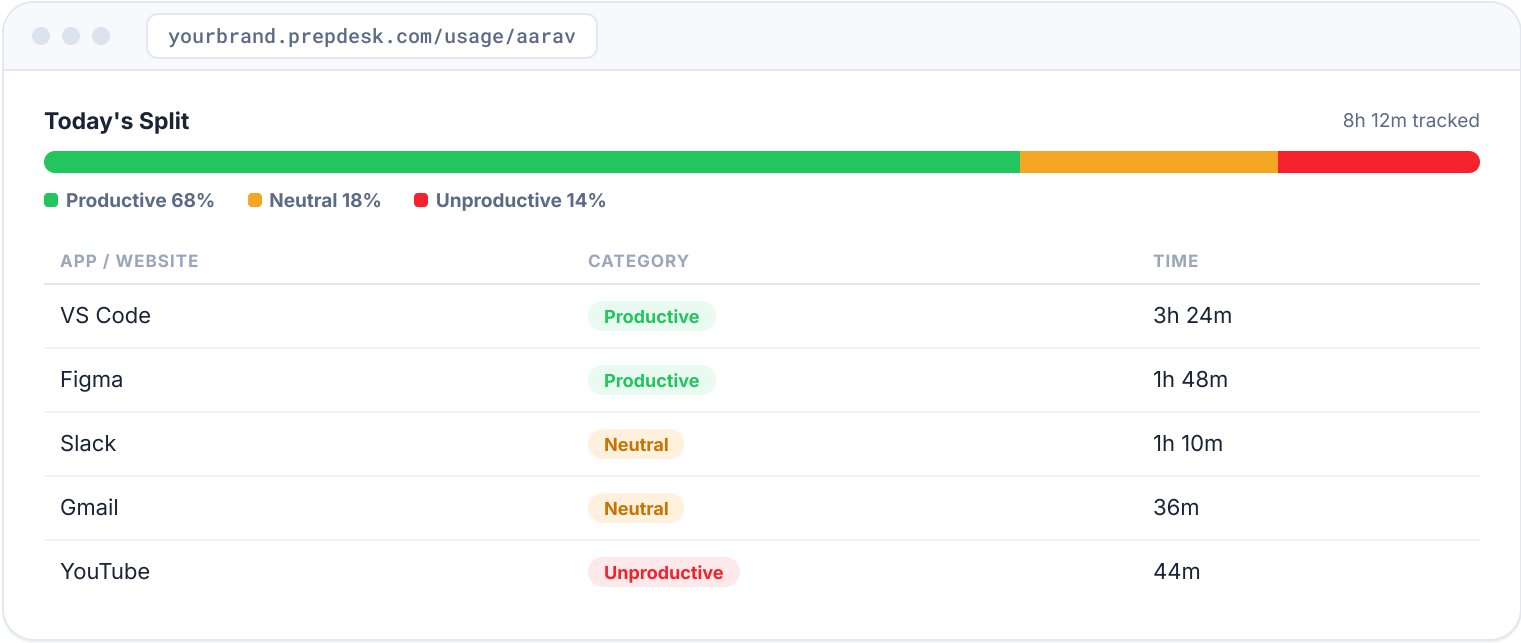

- ✓

Auto-categorized library
A growing database tags common apps and sites as productive, unproductive or neutral out of the box.
- ✓

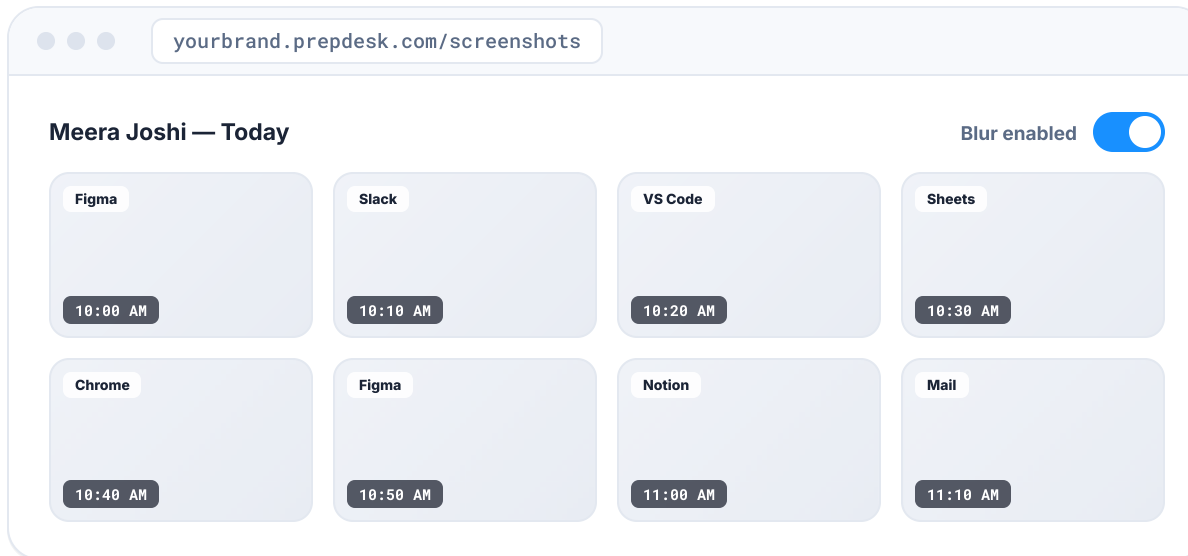

Team-defined categories
Re-tag any app or domain to match how your business actually works — Figma is productive here, YouTube might not be.
- ✓

Per-project breakdown
See which tools each project actually leans on, not just total hours logged.
- ✓

Private time, respected
Employees can pause tracking for personal breaks — nothing is captured while paused.

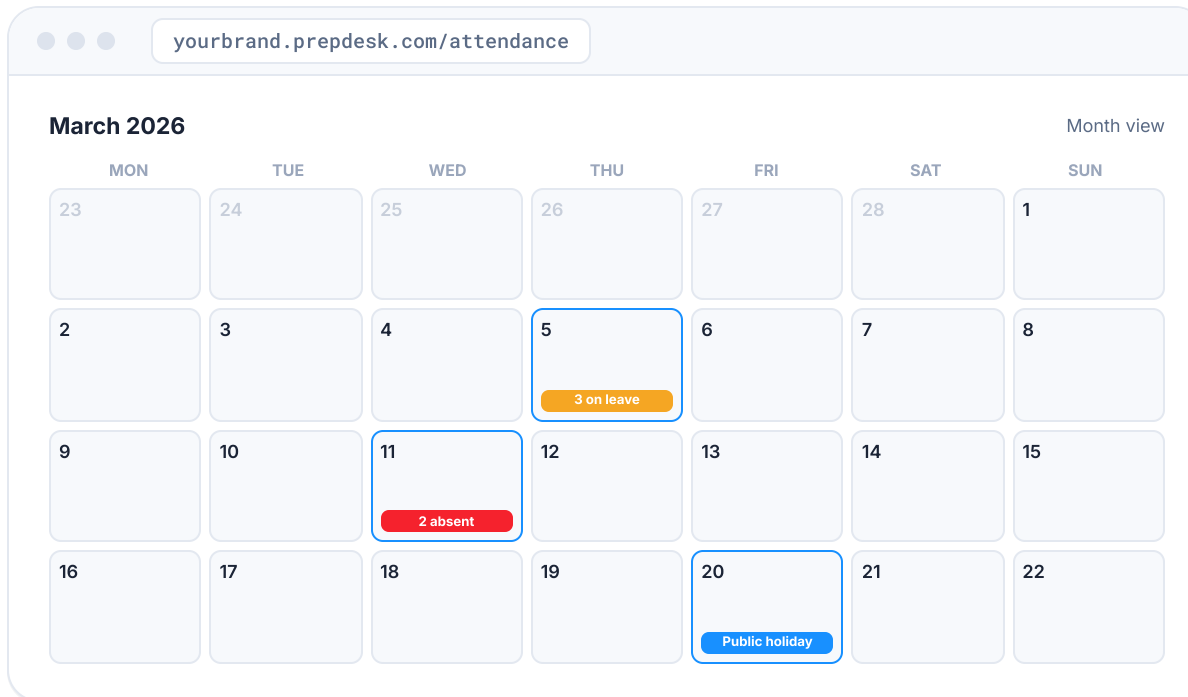

Visibility with **context** — never a keylogger.

- ✓ **Configurable capture interval**
Set screenshot frequency per role or team — from every few minutes to fully off.
- ✓ **Privacy blur, on by default**
Sensitive content can be blurred automatically while the activity context is preserved.
- ✓ **Activity levels, not keystrokes**
PrepDesk measures keyboard & mouse activity intensity — it never records what was typed.
- ✓ **Fully transparent to employees**
Every team member can see exactly what was captured about their own day, any time.

Rosters, holidays and time-off — one calendar.

- ✓ **Shift scheduling & rosters**
Build recurring shifts per team or location, and let attendance reconcile against them automatically.
- ✓ **Leave requests in one tap**
Employees apply, managers approve, balances update instantly — no email threads.
- ✓ **Location-aware holiday calendars**
Different offices, different public holidays — handled per location automatically.
- ✓ **Late & absent, auto-flagged**
Clock-ins are matched to the roster in real time — no end-of-month reconciliation.

Time, tied to the work — and the budget.

yourbrand.prepdesk.com/projects

6 active projects · billable & internal

PROJECT	CLIENT	BUDGET (HRS)	LOGGED	BURN	STATUS
Brand Website Revamp	Acme Retail	320	248	78%	On track
Mobile App v2	Internal	500	512	102%	Over budget
Q3 Marketing Ops	Nimbus Foods	140	91	65%	On track
Data Migration	Internal	90	34	38%	Starting

Time-to-project mapping

Every tracked hour lands on the right project & task.

Budget vs. actual

Spot burn-rate problems before the invoice does.

Billable tagging

Separate client-billable hours from internal work.

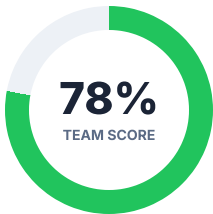

Exportable timesheets

Client-ready or payroll-ready, one click.

Data that **explains itself**, in plain English.

PrepDesk doesn't just log activity — it reads the patterns and tells managers what actually needs attention, before it becomes a problem.

Company Productivity Index

Rolling 7-day average, weighted across all active teams.

Design team productivity dropped 18% this week

Mostly on Tue–Wed, correlating with a 40% rise in meeting time. Consider trimming recurring syncs.

3 employees logged after-hours work on 4+ days

Rohan, Priya and Aditi show a pattern of late-night activity — flagged for a check-in, possible burnout risk.

Mobile App v2 will miss budget by ~9 days at current pace

Logged hours are outpacing the 500-hour estimate — projected overrun based on the last 3 weeks' burn rate.

Support team is your most consistent performer

82% average productivity for 6 straight weeks, with zero late clock-ins — worth recognizing.

MULTI-USER MANAGEMENT

Built for every layer — owners, HR, team leads, employees.

Owner / Admin

Full visibility across every team, location and report. Controls roles, billing & integrations.

HR Manager

Attendance, leave approvals, shift rosters and payroll exports company-wide.

Team Lead

Dashboards, productivity trends and task assignment for their own team only.

Employee

Their own timer, timesheets, screenshots and leave — full transparency into their own data.

Monitoring depth is configurable per role.

Screenshots, app tracking and reporting granularity can all be tuned separately for each team or role.

yourbrand.prepdesk.com/team

NAME	ROLE	TEAM	ACCESS	STATUS
 Aarav Shah	HR Manager	All (104)	Dashboard · Attendance · Reports	Active
 Meera Joshi	Team Lead	Design (12)	Dashboard · Tasks	Active
 Rohan Iyer	Employee	Engineering	Timer · Timesheets · Leave	Active

WEB APP

Manage everything from the **browser**. Only the tracker installs.

Works in any browser

Dashboards, reports & approvals — nothing for HR or managers to install.

Published under your domain

hr.yourbrand.prepdesk.com — PrepDesk stays invisible.

Role-based dashboards

Owner, HR, Team Lead and Employee views, one web app.

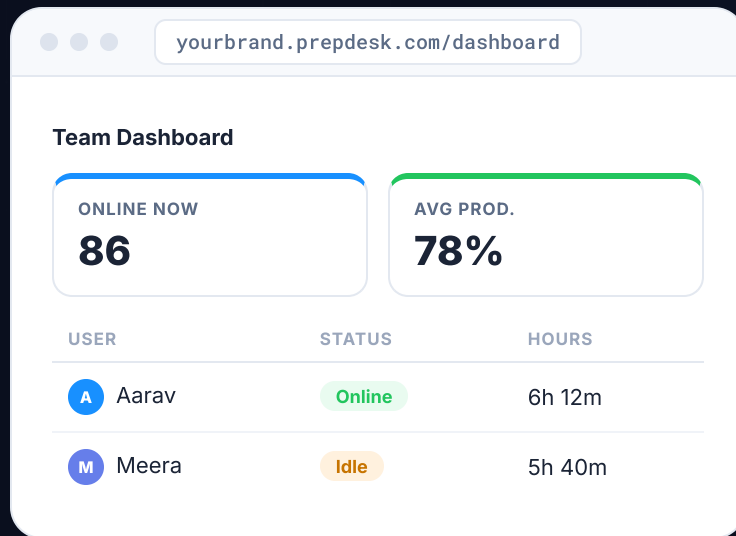

Real-time sync

Mirrors exactly what the desktop tracker logs, live.

Pairs with the desktop tracker

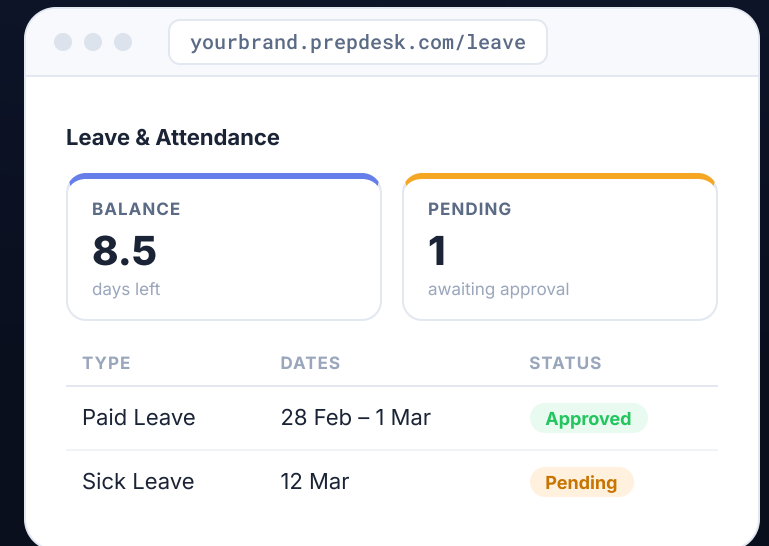

One lightweight agent (Win/Mac/Linux) is the only install — for time capture only.

Manager Dashboard

Employee Timesheet

Leave & Attendance

INTEGRATIONS

Fits into the stack you **already use.**

Native connections to the tools teams run their work on — no manual exports, no re-typing timesheets.

Slack

• Connected • daily digest

Clock-in reminders, leave approvals and end-of-day productivity summaries delivered straight to Slack channels or DMs.

Google Workspace

• Connected • calendar sync

Meetings from Google Calendar are auto-excluded from idle detection, and leave approvals sync both ways.

Jira / Asana / Trello

• Connected • task sync

Time tracked in PrepDesk maps directly to the task or ticket it was spent on — no double entry for engineering or ops teams.

Set up in a day

Connect accounts once — no developer needed.

Zero double entry

Tickets, tasks and time stay in sync automatically.

Payroll-ready exports

Hours flow straight into your payroll or ERP tool.

Always in sync

Data refreshes automatically, 24/7.

MORE INTEGRATIONS AVAILABLE ON REQUEST

Zoom & Google Meet

GitHub / GitLab

QuickBooks / Tally payroll

Microsoft Teams

Zapier / Webhooks

SSO / SAML / Okta

Numbers that show exactly where **time** and **cost** go.

- Custom date ranges**
Any period, any team, any location.
- One-click export**
CSV & PDF, branded with your logo.
- Scheduled digests**
Daily or weekly summaries, on email.
- Drill down anywhere**
From a headline number to the exact timesheet.

Monitoring your team should still feel **fair**.

PrepDesk is built to be transparent by default — every employee can see exactly what's tracked about them, and every organization controls exactly how deep that tracking goes.

No keystroke logging

PrepDesk measures activity intensity — it never records what was typed.

Blur & consent controls

Screenshots can be blurred by default, with capture visible to the employee it belongs to.

Configurable per role

Set monitoring depth by team, role or location — engineering ≠ field sales.

Data residency options

Choose where your data is stored to meet regional compliance needs.

Full audit trail

Every access to an employee's data is logged — visibility cuts both ways.

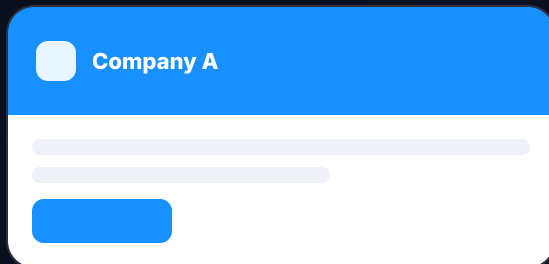

Employee-visible dashboards

Team members see their own tracked time, apps and screenshots — no black box.

WHITELABEL & CUSTOMIZATION

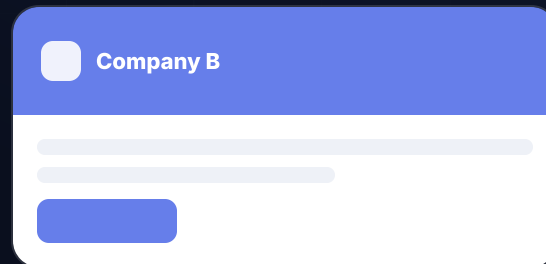

This isn't our product on your desk. It's **your product**, built by us.

Every PrepDesk deployment ships under the client's own brand — logo, colors, domain and installers. Prepseed is the engine underneath, never the name on screen.

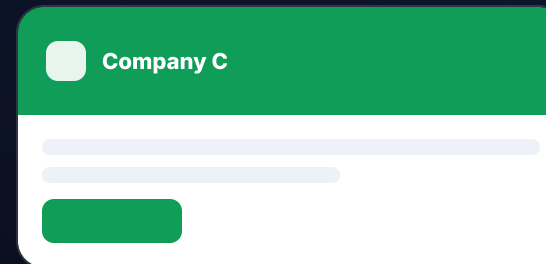

Your logo & brand color

Applied across the web app and every desktop agent installer.

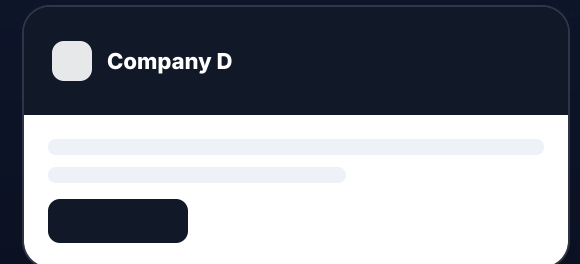

Your domain

hr.yourbrand.prepdesk.com — employees never see "Prepseed."

Your notifications

Email & Slack alerts sent under your brand name, not PrepDesk's.

Your policies

Custom monitoring rules, shift patterns & leave types matched to how you work.

Your desktop installer

Windows, Mac & Linux agents branded and signed as yours.

Your reports

Every exported PDF and dashboard carries your branding.

Your support line

Your employees and admins reach you — never Prepseed.

Your pricing

You decide what to charge your own teams or clients.

ONE VENDOR, ONE PLATFORM

No third-party tools. No stitched-together stack.

Most companies pay for — and babysit — five different subscriptions just to track time, attendance and productivity. With PrepDesk there's nothing else to buy, connect or troubleshoot.

 DeskTime / Time Doctor → Automatic Time Tracking	 Hubstaff / ActivTrak → App & Web Usage + Screenshots	 Toggl Track → Projects & Task Tracking	 BambooHR / Deputy → Attendance, Shifts & Leave
 Zapier / Make → Native Slack, Google & Jira sync	 Google Sheets / Excel trackers → Live Reports & Analytics	 Tableau / Power BI add-ons → AI Insights & Reporting, built in	 Separate payroll upload tools → Native payroll-ready exports

WHAT THAT MEANS FOR YOU

 One vendor, one bill No juggling five renewals and five support tickets.	 Nothing breaks in between No API limits, sync failures or automation glue to babysit.	 Your data stays in one place Never scattered across five vendors' servers.	 One team accountable Prepseed builds, hosts and supports all of it — no finger-pointing.

SWITCHING MADE EASY

Already on another tracker? We **migrate everything** — you just watch it happen.

Switching shouldn't mean starting from zero. Hand us access and our team migrates every timesheet, attendance record and leave balance into PrepDesk — safely, without disrupting payroll.

1

Share access

Read-only access to your current tracker, HRMS or Excel sheets. No downtime, no disruption.

2

We migrate everything

Timesheets, attendance history, leave balances and org structure — mapped and moved by our team.

3

You watch it happen

Track migration progress in real time — nothing goes live until you've reviewed and approved it.

4

Go live, old tool retired

Your team clocks in on PrepDesk from day one — zero data loss, zero manual re-entry.

WHY TEAMS TRUST THE MIGRATION

Zero data loss

Every record accounted for, verified before go-live.

Old system stays live

Nothing is switched off until you're fully ready.

Free, done-for-you

No extra cost, no work for your team beyond granting access.

Dedicated migration team

A real person owns your switch-over, start to finish.

WHY PREPSEED

Proven at scale, built to be yours.

Prepseed is an AI-first, whitelabel software studio based in Ahmedabad, India — building CRM, HRMS and custom platforms for EdTech, Real Estate, Healthcare and Enterprise teams. PrepDesk runs on the same engine already trusted by 250,000+ users, so you get a mature, battle-tested product from day one — not a first version.

400,000+ users

Powering platforms across EdTech, Enterprise, Healthcare and Real Estate.

Zero-downtime infrastructure

Running on US military-grade servers with automatic failover — always on.

Built for scale

From 50 employees to 50,000+ — same platform, no re-platforming later.

Real support, real people

A dedicated team for setup, migration and ongoing customization.

\$1.2M in trusted backing

Investor-backed (2022) engineering team, not a freelance build.

Data secured across two continents

Primary data stored in India; encrypted backups held in the US.

Total data privacy

No one but you sees the full company database — every other role stays scoped.

Fast to launch

Whitelabeled & live in weeks, not quarters.

LET'S BUILD YOUR PLATFORM

Your workforce platform. Your brand. **Live in weeks.**

Book a walkthrough and we'll map PrepDesk's time tracking, attendance and AI reporting to your teams, your OS mix and your brand.
